EXPERIENCE

BHAKTIVEDANTA HOSPITAL | DATA VISUALIZATION INTERN

DEC 2018 – JAN 2019

- My role was to create **dashboards** by converting raw data into **pictorial format** using **Tableau** software and publish dashboard on their servers.

- These dashboards helps **doctors** to gain various information **about the patients.**

PROJECTS

- **Heart Loom**

1. An android fashion app, developed in **Flutter** integrated with **Firebase** real-time database.

2. A user can **see** all the products register by **itself** or any other **users**, but allow **CRUD operations** on their products only.

3. **Payment Gateway** is not added yet.

GitHub | **App**

- **Garbage Profiling**

1. A **computer vision** model developed using **YOLO** algorithm that recognize garbage (plastic, paper, metal, biodegradable, cardboard) in real-time or by given input image.

GitHub

- **ServCrud**

1. A user friendly **web application** developed **using java-servlets**, **HTML**, **CSS** and **MySQL** database.

2. This web application allows CRUD operations for student's data.
